

Introducing TranscriptPartner™

Generative AI-Powered Deposition and Hearing Summaries

Amazing Quality, Incredible Speed—at Unbelievable Prices!

TranscriptPartner is revolutionizing deposition and hearing transcript summarization for legal professionals. Our cutting-edge, GenAI-powered service delivers comprehensive, multi-layered summaries overnight, rivaling the detail and quality of manual efforts—at a fraction of the time and cost.

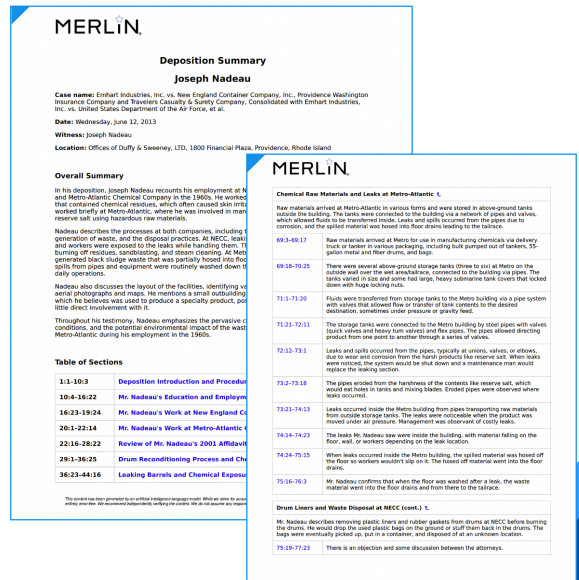

Manual summaries are tedious, time-consuming, and expensive. TranscriptPartner uses industry-leading GenAI models to automate the process. They can quickly analyze transcripts of any length, producing concise, accurate summaries with transcript links.

Identify key testimony, prepare for depositions and develop winning strategies more efficiently than ever. We can also summarize witness interviews, medical records and chat messages, making it an indispensable tool for modern legal practices.

You Get

- **Speed:** Overnight delivery for transcripts of any length. Quicker if needed.
- **Quality:** Compare our summaries with your best efforts. Satisfaction guaranteed.
- **Savings:** Summaries as low as \$1.00 per page. Compare against manual efforts.

Experience the future of transcript summarization—faster, more affordable—with no compromise in quality.

Why Use Generative AI for Deposition Summaries?

 <p>Fast Summaries of any length and volume delivered overnight.</p>	 <p>Accurate AI summarization ensures uniform, high-quality output regardless of complexity.</p>	 <p>Cost Effective. High-quality summaries at a fraction of the cost of human summaries.</p>
 <p>Customizable Summaries in multiple formats. PDF or Word, for easy editing.</p>	 <p>Secure Files are maintained in AWS in locked down Virtual Private Clouds</p>	 <p>Linked Summary statements are linked to the transcript for quick reference.</p>

Transform Your Deposition Workflow!

By leveraging TranscriptPartner, legal teams can transform a traditionally time-consuming and costly process into a strategic advantage. This innovative service empowers attorneys to focus on strategy and advocacy, confident in their rapid access to accurate, comprehensive summaries of critical testimony. The result is more efficient case preparation, faster response times, and ultimately, better outcomes for clients.

Customize Your Summaries

Choose from multiple summary formats to match your summary style and needs:

- **Overall Abstract:** An insightful testimony overview.
- **Table of Contents:** Direct links to key lines of inquiry.
- **Topical Summaries:** Detailed précis for each interrogation section.
- **Direct Links:** to key witness testimony by page and line number.

Enjoy These Features

Get hearing and deposition summaries easily without depending on your legal team.

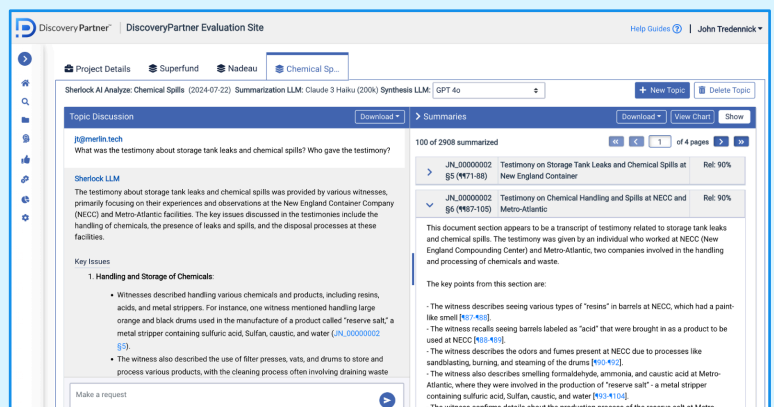

- **Editable:** Available in PDF and Word formats.
- **Fast:** Overnight delivery standard.
- **Affordable:** Prices as low as \$1.00 per transcript page. Talk to us about volume discounts or enterprise pricing.
- **Quality:** Equal if not better quality and topic coverage. If you aren't satisfied for any reason, we will make it right.

Elevate Your Analysis with Interactive Transcripts

Take deposition review to the next level with DiscoveryPartner, our powerful, GenAI-integrated discovery platform. Load all of your transcripts and start asking questions (rather than struggle with keyword searches).

Key Features

- Search across hundreds of transcripts, text messages, and medical records in seconds.
- Receive answers and summaries, not just search hits.
- Get reports with links to relevant testimony.

Experience the future of multi-transcript analysis with DiscoveryPartner's intuitive UI and powerful AI capabilities.

About Merlin

Merlin Search Technologies is a leader in AI and secure cloud technology, leveraging GenAI to revolutionize search, investigations, and discovery workflows for legal professionals.

With two decades of experience in building advanced discovery platforms, our team has developed software that sets new standards for efficiency and cost-effectiveness. From our innovative GenAI integration to our cutting-edge, AI-powered deposition summaries, we're at the forefront of legal technology innovation.

Our mission is to transform how discovery professionals handle their most complex, data-intensive challenges. By combining GenAI with secure, flexible, and cost-effective cloud technologies, we help clients find, analyze and review critical information faster and more affordably than before.

Merlin technology revolutionizes eDiscovery, blending algorithmic search with Generative AI. It provides not just results, but analysis, replacing long scrolls and doubtful sources with rapid, confirmed answers."
